Hingna Road, Wanadongri, Nagpur - 441 110
NAAC A++
Ph.: 07104-237919, 234623, 329249, 329250 Fax: 07104-232376, Website: www.ycce.edu
Department of Computer Technology

Vision Statement of the Department.

To be a preferred hub for nurturing computer engineering aspirants through innovative, ethical, value-based technical education, impactful research, and industry collaboration, to become successful professionals contributing for the betterment of society.

Mission Statement of the Department.

To nurture computer engineering professionals by offering Dynamic learning environment that encourages problem-solving using emerging technology, National Education Policy aligned evidence-based technical education, fostering ,innovation, research, and industry–institute collaboration & Holistic, ethical and sustainable development for lifelong success.

Session 2026-2027

Vision: Dream of where you want.	**Mission:** Means to achieve Vision

Program Educational Objectives of the program (PEO): (broad statements that describe the professional and career accomplishments)

PEO1	**Preparation**	**P: Preparation**	**Pep-CL abbreviation pronounce as Pep-si-lL easy to recall**
PEO2	**Core Competence**	**E: Environment (Learning Environment)**	
PEO3	**Breadth**	**P: Professionalism**	
PEO4	**Professionalism**	**C: Core Competence**	
PEO5	**Learning Environment**	**L: Breadth (Learning in diverse areas)**	

Program Outcomes (PO): (statements that describe what a student should be able to do and know by the end of a program)

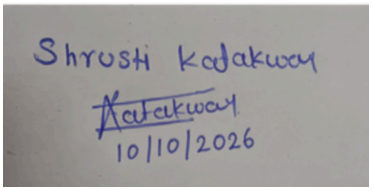

Keywords of POs:
Engineering knowledge,Problem analysis, Design/development of solutions,Conduct Investigations of Complex Problems, Engineering Tool Usage, The Engineer and The World,Ethics, Individual and Collaborative Team work,Communication, Project Management and Finance, Life-Long Learning

PSO Keywords: Cutting edge technologies, Research

"I am an engineer, and I know how to apply engineering knowledge to investigate, analyse and design solutions to complex problems using tools for entire world following all ethics in a collaborative way with proper management skills throughout my life." *to contribute to the development of cutting-edge technologies and Research*.

Integrity: I will adhere to the Laboratory Code of Conduct and ethics in its entirety.

Vision Statement of the Department.

To be a preferred hub for nurturing computer engineering aspirants through innovative, ethical, value-based technical education, impactful research, and industry collaboration, to become successful professionals contributing for the betterment of society.

Mission Statement of the Department.

To nurture computer engineering professionals by offering Dynamic learning environment that encourages problem-solving using emerging technology, National Education Policy aligned evidence-based technical education, fostering ,innovation, research, and industry–institute collaboration & Holistic, ethical and sustainable development for lifelong success.

Session	**2026-27 (ODD)**	**Course Name**	**HCPA**
Semester	**5th**	**Course Code**	**23ADS1524**
Roll No	**119**	**Name of Student**	**Shrusti Katakwar**

Practical Number	**08**
Course Outcome	1. Understand various internet technologies. 2. Design the web pages using HTML and CSS. 3. Implement the XML technology to store the data. 4. Develop the interactive web pages using JavaScript.
Aim	Implement an image filter (e.g., Gaussian blur) using parallel programming.
Problem Definition	Implement an image filter (e.g., Gaussian blur) using parallel programming.
Theory (100 words)	Image filtering is a technique used to modify or improve an image by reducing noise, smoothing details, or enhancing its appearance. Gaussian blur is a common image filter that smooths an image by calculating the weighted average of neighboring pixels using a Gaussian kernel. In parallel programming, the image is divided into smaller sections, and multiple threads process different pixels simultaneously. OpenMP can use multiple CPU threads, while CUDA can use GPU threads for faster processing. Parallel image filtering reduces execution time, especially for large images. It is widely used in computer vision, image processing, medical imaging, and artificial intelligence applications.

Vision Statement of the Department.

To be a preferred hub for nurturing computer engineering aspirants through innovative, ethical, value-based technical education, impactful research, and industry collaboration, to become successful professionals contributing for the betterment of society.

Mission Statement of the Department.

To nurture computer engineering professionals by offering Dynamic learning environment that encourages problem-solving using emerging technology, National Education Policy aligned evidence-based technical education, fostering ,innovation, research, and industry–institute collaboration & Holistic, ethical and sustainable development for lifelong success.

Procedure and Execution (100 Words)	Step for Implementation: 1. Load Image: Read the input image using an image-processing library. 2. Initialize Filter: Define a Gaussian blur filter and its kernel. 3. Divide Image: Divide the image into smaller sections or assign individual pixels to different threads. 4. Implement Parallelism: Use OpenMP for CPU threads or CUDA for GPU threads. 5. Apply Filter: Calculate the weighted average of neighboring pixels for each pixel. 6. Store Results: Save the processed pixel values in the output image. 7. Display Image: Show the original image and the blurred image. 8. Analyze Performance: Compare execution time with sequential image filtering.

Vision Statement of the Department.

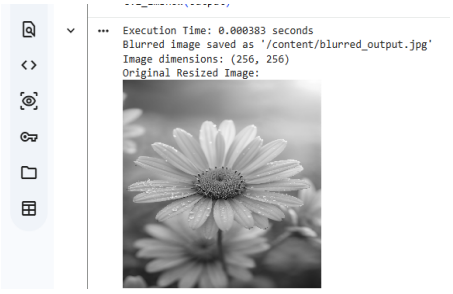

To be a preferred hub for nurturing computer engineering aspirants through innovative, ethical, value-based technical education, impactful research, and industry collaboration, to become successful professionals contributing for the betterment of society.

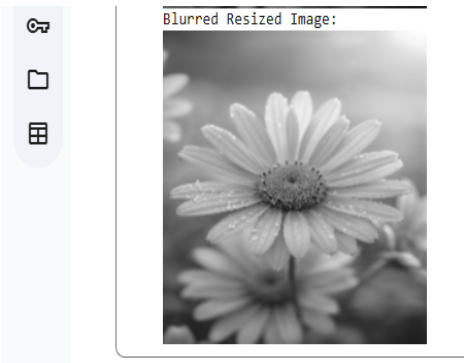

Mission Statement of the Department.

To nurture computer engineering professionals by offering Dynamic learning environment that encourages problem-solving using emerging technology, National Education Policy aligned evidence-based technical education, fostering ,innovation, research, and industry–institute collaboration & Holistic, ethical and sustainable development for lifelong success.

Output:

Vision Statement of the Department.

To be a preferred hub for nurturing computer engineering aspirants through innovative, ethical, value-based technical education, impactful research, and industry collaboration, to become successful professionals contributing for the betterment of society.

Mission Statement of the Department.

To nurture computer engineering professionals by offering Dynamic learning environment that encourages problem-solving using emerging technology, National Education Policy aligned evidence-based technical education, fostering ,innovation, research, and industry–institute collaboration & Holistic, ethical and sustainable development for lifelong success.

Output Analysis	1. The program successfully applies the Gaussian blur filter to the input image. 2. The output image appears smoother, with reduced noise and fine details. 3. Parallel processing allows multiple pixels to be processed simultaneously. 4. The processed image is compared with the original image to verify the result. 5. Parallel execution can reduce processing time for large images compared to sequential execution.

Conclusion	The image filtering technique was successfully implemented using parallel programming. The Gaussian blur filter reduced noise and smoothed the image by processing neighboring pixels. Parallel processing using OpenMP or CUDA improved computational efficiency by processing multiple pixels simultaneously. Thus, parallel image filtering is useful for faster image processing and computer vision applications.
